

SUNBLAZE®

— SUN LOVING MINI ROSES —

Grow Out Schedule

7.15.2020

SUNBLAZE® 72-CELL LINER TO #1 CONTAINER

- Use coarse, well-drained media for canning
- Maintain pH between 5.5–5.6
- Maintain EC between 1.0–2.0 using pour-through method
- Keep roses on 7–10 day fungicide schedule
- Can liner, wait 5–6 weeks until roots are at edge of container, then plant is ready for trim
- After 5–6 weeks, trim plant again
- In an additional 4–5 weeks, container will be shippable

EXAMPLE

Week 7	Week 12	Week 17	Week 21
Can	Trim	Trim	Shippable

If plants need more bulking, trim again. Then, in 4–5 weeks, the plants will be shippable.

*Grow out times can vary, depending on weather and cultural conditions.
